

 **Sauna Design Home**
manufactured in Hungary

BE PART OF THE ISAUNA MANUFACTORY FAMILY!

In the beginning, the main profile of our company was the production and sale of individual indoor & outdoor saunas. Later on, the idea of wellness sauna houses or comfort sauna houses was more and more frequently raised among the market demands. Thanks to the outstanding designers and experienced professionals of our company, we have managed to open a new dimension in the chapter of building a unique outdoor sauna house.

Thanks to our re-thought production technology, we now offer our customers top quality thanks to the most innovative technologies, industrial-grade machinery, digital quality control systems and customised solutions. As a symbol of our manufactory's 20 years of international experience, we wanted to give our beloved customers something truly complex. This is how the NEW iSauna Design Home range was born.

DESIGN - IMPLEMENTATION - SERVICE IN ONE HAND!

Let us use our 20 years of international experience to help you make a safe and informed purchase. The designer design fee for a good sauna house pays for itself several times over already in the design phase, because one bad structural system, a few unused square meters - and you have already thrown hundreds of thousands, millions, many times the design fee out the window, even though you have not even started to build it. That's not what you want, is it?

Our unique products are made exclusively by Hungarian craftsmen with hand and passion, meeting international TÜV certification. Designed and manufactured according to ever-renewing trends, iSauna Design Home products can be a worthy addition to homes, gardens, terraces, wellness hotels, fitness centres and home wellness.

ISAUNA INTERIOR DESIGN

IN THE SPIRIT OF PERFECTIONISM

MODERN ELEGANCE
THE REAL MAGIC IS IN THE DETAILS

Thanks to a conscious design, we have created a unique interior and exterior design world in which solid wood cladding inserts and façade openings are given prominence. As the client's aim was to reduce the energy consumption of the building, we placed great emphasis on the thermal insulation of the building.

MORE THAN A WELLNESS SAUNA HOUSE

CATERING FOR ALL THE NEEDS OF FAMILY AND FRIENDS

In all cases, wellness design and construction starts with a comprehensive, thorough, all-inclusive discussion. You tell us your individual ideas and desires, our HIGHLY DRAWED DESIGNERS will PRESENT them in a 2 or 3 dimensional plan. The custom design will take into account the location, the envisioned design, the wellness features you choose and your lifestyle.

COMPLETE DESIGN AND IMPLEMENTATION WITH WARRANTY

THE LATEST GENERATION OF MASSAGE POOLS

Engineering, cutting-edge technology, design and expertise: these are the ingredients of a high-quality product. Villeroy & Boch has developed a range of sophisticated features for its new family of massage pools.

By far the most energy-efficient massage pools in the world. All this is ensured by the complete foam insulation of the internal structure, revolutionary pipework (90% less than conventional pools) and the thermally insulated thermo roof.

From a family-run manufactory that has been in continuous development since 2004!

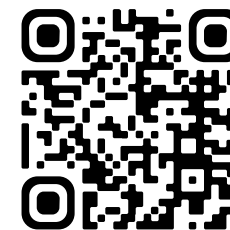

villeroyboch-jacuzzi-spa

UNIQUE JETPAK TECHNOLOGY

Unique massage experience thanks to the unique JetPack technology. Instantly interchangeable JetPack massage elements allow you to tailor your wellness experience to the needs of the moment, even while in use. And you can upgrade at any time with the latest JetPacks from the Sport, Wellness and Relax massage gel categories.

Ultra-modern double filter system with Microban technology, an antibacterial surface coating. The use of chemicals is further reduced by the ozonizer, which requires no maintenance for maximum safety.
